

- From a Clinician's Perspective

Trinh Foundation Australia Limited (TFA) is an independent, voluntary, not-for-profit organisation which has been established in Australia to raise awareness of speech therapy as a profession in Vietnam and to assist in the planning and funding of formal speech therapy training courses in Vietnam.

Members may recall in the May 2009 edition of *Speak Out*, that the Trinh Foundation had just completed its first series of lectures (in February) and clinical training (in March) to health professionals in Ho Chi Minh City. In July, a second round of clinical training was provided, to be followed by a further lecture series in September.

Due to the success of this current Short Course, Trinh Foundation Australia has committed to providing a further three years of regular clinical training blocks for staff at the ENT hospital in HCMC. TFA will be seeking clinicians who are prepared to volunteer their time for this rewarding project. For further information regarding the TFA, and information regarding opportunities to assist the foundation in its work, go to: <http://trinhfoundation.org/>
