

TFA's speech therapy training courses

A group of doctors, nurses and physiotherapists have completed a "Short Course in Key Topics in Speech Therapy" launched at the HCM City Ear, Nose and Throat Hospital early this year. The course has been made possible by the Trinh Foundation Australia (TFA), an independent, voluntary, non-profit organization estab-

lished in Australia to raise awareness of speech therapy and to assist in planning and funding of speech therapy training courses in Vietnam.
